Summary

I've practical experience in building dynamic web applications using HTML, CSS, JavaScript and React. I've converted multiple Figma designs into responsive websites, added functionality with JavaScript, worked with APIs, and developed secure login systems with Firebase.

Skills

Frontend: React.js, React Router, Tailwind CSS
Tools: Git, VS Code, Figma, Chrome DevTools
Deployment: Firebase Hosting, GitHub Pages
Analytical Abilities: API integration, dynamic data handling, translating user requirements into efficient web solutions

Projects

Portfolio Website | Live | GitHub   January 2026

- Tech Used: React, Vite, Tailwind CSS, GitHub Pages
- Personal portfolio showcasing projects and skills.

Dragon News | Live | GitHub   October 2025

- Tech Used: React, Firebase, React Router, Context API
- Integrated Firebase authentication for login and registration.
- Implemented protected routes and global state management.

Email Password Auth | Live | GitHub   September 2025

- Tech Used: React, Firebase, Context API
- Implemented secure email/password authentication.
- Managed authentication state via Context API.

Education

B.Sc. in Physics   Graduation: 2028
Rajshahi College
